

Transportation *Amusement Park*

Amusement Parks

Little darling 'member this?
You had to baby sit so we went to the amusement park
You and I just walked around
Your parents got so pissed cause we came way past after dark

But I made you those shots and I won you those bears
We barely fit in the car but your sister now she didn't care
And I thought you were so mine

Little darling 'member this?
We used to get so mad that all we could do was kiss.
Or that time you ripped your gown
I bought you some extra juice just in case your sugars went down.

Or that Christmas with the strange little gift that you got
I bet you still think he's cool well I still think he's not
And I, I didn't mean to be unkind.

And there in a small train-car floating by your hair was a crystal ball

Later on I found it out
I think you read this book and you went into public health
And your mother told me it
You found "Mr. Right" to protect your baby's wealth

And then one day when you took your horse into town
You got a business suit and you had to parade it around
Well I, I can sing mine.
I've been in love what you hope to find

Love On The Ground

Is Something missing it feels lighter to me
The force in the field the sum that it yields

In the expression of this matter you'll see
The import of clear you have nothing to fear.

Just tell me now who let love touch the ground?
Ohh tell me who let love?

I hear there's laughter on the outskirts of town
When there's no one around it's such the freakiest sound

Sometimes it feels like a burdensome load
aAtrickier road, a lick of the toad.

Change is a pattern oh the prettiest of all
But then who can recall the last one of all?
The all

Tell me who let love touch the Ground?
Ohh tell me who let love touch the ground oh tell
Me who let love? Who let love? who Let love touch ground?

Love on the Ground (Continued)

Don't care if modern is pre, post, or flash
If your computer has crashed 'yer out of your stash

We can implore you with the slightest of ease
A walk down the street a corner by me

Just tell Me now who let love touch the ground
Who let love touch the ground Ohh tell me who let
Love who let love who let love touch the ground

Pool Parties

Sun's going down on the hill crickets chirping
Clothes that were spilled on the way cell phones missing
Oh summer, I wanna jump in I'm gonna float on my back
Singing "what was that song"?

Pool Parties at night
2 hearts that beat delight

Now and then I fade in and out but I'll always remember
Trying to figure those facts and what it's all about in those days til september
Ohh something just brushed passed my leg could it be that girl
Who was talking to my friends

Pool Parties at Night
2 hearts that beat delight and we'd win
Your bathing suit was white
Too hot to know it's nice

I'm drifting back for my pleasure some fly around the world
But deep deep down so they say There was a hidden treasure
Ohh summer don't cast all your spells where will you be
When The leaves start falling?

Danni

You're so young and Danni the sky's so blue
And I could tell by the way that you walked in the room
The boy who sped away just now must have changed his tune
Well here's a fact and don't you forget it
When you look on back don't regret it
Danni don't you play with those boys You'll be late and
They're always just making that noise if you do just behave
I heard that love takes it time makes it real something to live for

Danni take your time if you do
No matter who you choose

'Cause Skinny Minny and Grammy now they love you
But they can only help out with the things that they know are true
And I couldn't tell a lie for you if you were skipping school

Well what it takes to get a new thing started
Ain't worth half a damn when you're brokenhearted

Danni don't you play with those boys you'll be late and
They're always just making that noise if you do just behave
Tangled up in having the time all your life

Danni (Continued)

When being your age should be cool should nice
Ain't it just like a star's raging glory?
Caught in the mystery of its own life too
It don't compare to the feelings I get when I'm with you

Danni with an I
Danni with an I

Maybe sometimes I can't believe all that you do

I Will Be What I Was

From where I stand there's a place to the sun.
I say just because I will be what I was.

And like the air to breath I was born of thee.
Like the air to be I will be what is me.

Lovers so young you're careless and free.

Andrea does this world even turn you on?
Like the shade of an old tree planted here for years?

Ohh shadow

Catch a smile if you can before the days is done
Before the color has run step on down for some fun
Be there now just to get it all right
Tap the pulse of the night
Give sweetly all her might

Andrea does this world even turn you on?
Like the sound of an old song planted and long gone?

Sun shine on

Blew our Minds

Ooh on this day would you declare you're nowhere?
And how the screws had come undone it's no fun.

Well would you live your life to find
You're just a shape in time?

Ahh little girls and little boys
The beauty's what you shape and how it shines

We blew our minds
We blew our Minds

And in a haunting sort of way you're ok
Like Holiday when we were younger how we'd play

Stars in the sky

We never say she's pretty gettin' ready for the show
By the time we hit the city I bet she knows

I got a spaceship that flies over the houses in the night
But we never take them flying they don't ask why

Are the stars in the sky? I'd only wish for two
One for me yea one for you

We got shipwrecked off Bikini man we was rowing home
But we don't talk about the weekends just what you know

And to the info that split we call you woman now
We got those afternoons on weekends we just hang out

Are the stars in the sky? I'd only wish for two
One for me yea one for you

How big's the Sun?
How small's the one?
From where'd we come?

It's not in your science books
It's like her little tender looks
or fishing hooks.

Are the stars in the sky? I'd only wish for two
One for me yea one for you

And guitars I know why it's coming up around the bend
with all the love it could send

The Yard

We got a hotel in the yard (the yard)
Built a hotel in the yard (the yard)

My baby don't mind it that my jobs too tough
She says settle down boy ain't you had enough
Ain't you had enough?

We're doing sixty in the yard (the yard)
Going sixty in the yard (the yard)

My baby don't mind it that I look too rough
She says come inside boy ain't that sweet enough
Ain't that sweet enough?

We're raising snowcats in the yard (the yard)
Raising snowcats in the yard (the yard)
My baby don't mind it that my job's too tough
She says settle down boy ain't that sweet enough
She says now come inside boy ain't that sweet enough
Ain't you had enough?

'Cause if you come in the morning don't you wake me up
Yes, if you come in the morning don't you wake me up
'Cause if you come in the morning

The Yard (Continued)

Were wasting banshees in the yard (the yard)
Wasting banshees in the yard (the yard)

My baby don't mind it that my jobs too rough
She says come inside boy ain't that sweet enough
Ain't that sweet enough?

I sold the house I was playing cards (cards)
I sold the house I was playing cards (cards)

My baby don't mind it when I call her bluff
She says rock me baby ain't you good enough?
She says now rock me baby ain't you sweet enough?

'Cause if you come in the morning don't you wake me up
Yes, if you come in the morning don't you wake me up
'Cause if you come in the morning you can keep your stuff
but it's out in the yard

Just leave a light on baby
Just leave a light on
I'm coming home

Where's the Sun Go?

Where's the sun go when the sun goes?
When it hides you know it hides all night
it hides all night

Where's the train go when the train goes?
When it rides it rides all night
you know it rides all night

Anyway, We're here if you need to
We heard the shot that rang out was ringing in your ears
And to all the friends that hang out so dear to me this far

Well how do we know when we know?
When we laugh you know it's out of sight
You know it's out of sight

Where do we go when we go?
When we die I hope it's alright
you know I hope you're alright

Anyway, We're here if you need to
We heard the shot that rang out was ringing in your ears
And to all the friends that hang out so dear to me this far
Oh yea we made some room in the car

Anyway, We're here if you need to
We heard the shot that rang out was ringing in your ears
And to all the friends that hang out so dear to me this far
We made love and it can't be wrong

Let It Out

They're fighting out in the streets
To live their life on the way

And everyone you gotta meet
Thinks they got something to say

Davie don't give a damn
He's got a wife and a kid

Then he tips his hat to dedication
Knowing what the boys did

Cause When the boys let it out they want it
And the girls check it out they want it too
When the Boys let it out

Some dudes like a pretty face
You know some like it in drag

Billy's got her up on blocks
Screwed it in with Chevy mags

And I don't know
What's become of the scene

I don't know what really rocks
Just play it fast and play it clean

Cause When the boys let it out they want it
And the girls check it out they want it too
And the banners still fly they fly it every night

So when the doctors have to come for you
And there's nothin' going to pull you through

Let the shape of your heart define it
Let the words of love describe it

And let the record man say a fine hit
And the Girlfriends all drink their red wine
While the mothers all sit in resignation
